Welcome to the Open Badge Network

The Open Badge Network (OBN) is an European strategic partnership dedicated to Open Badges and funded under the European Erasmus + Program. Open Badge Network (OBN) brings together organisations from across Europe to support the development of an Open Badge ecosystem, promoting the use of Open Badges in formal, non-formal and informal learning.

Mozilla Open Badges is an open standard that allows diverse types of skills, competencies and achievements to be recognised and shared across the web. Schools, universities, employers and informal learning providers globally are using Open Badges to capture lifelong learning which may be unrecognised by traditional forms of credentialing.
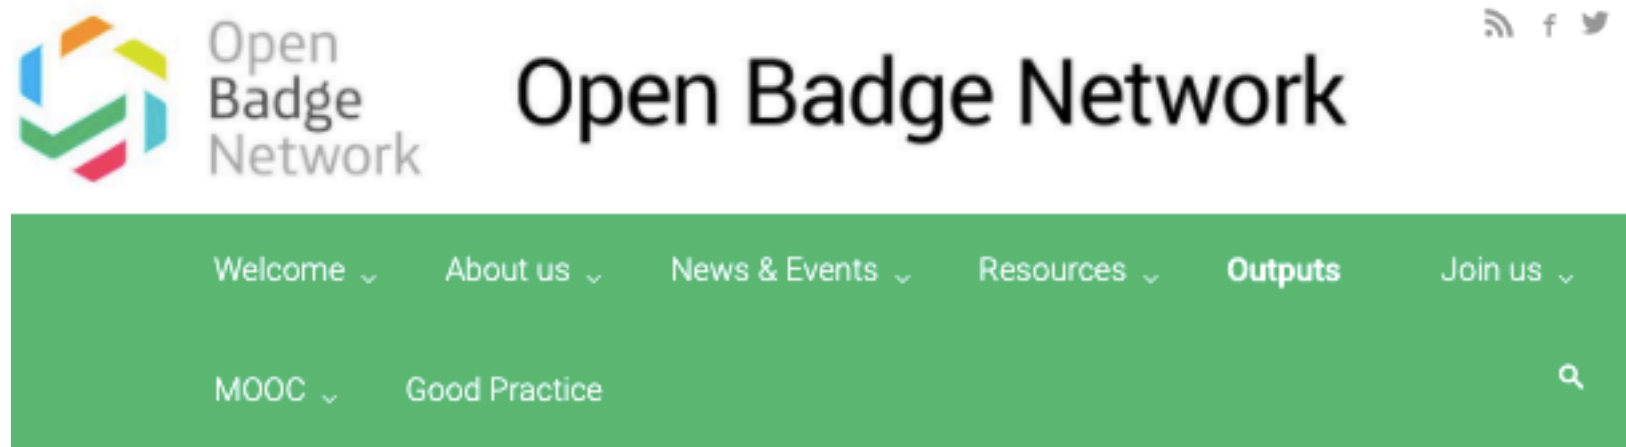

Open Badge Network (OBN) aims to provide a trusted source of independent information, tools and informed practice to support individuals and organisations who are interested in creating, issuing, earning, endorsing and using Open Badges in Europe and beyond.

You can see who is already issuing Open Badges on the interactive online Inventory of Open Badge Projects (see the map below) and share your planned or already running Open Badge projects too.

We are looking for individuals and organisations from across Europe to join us and help us build the Open Badge Network further! It doesn't matter whether you are an Open Badge novice or an expert, if you are interested in Open Badges and would like to support the Mission included in the OBN Charta – you are very welcome you as a member of the Open Badge Network!

Please register here: OBN community registration.

OPEN BADGES OUTPUTS

OPEN BADGES USE CASES

O2-A1 Use Cases

The provision of the Open Badge Infrastructure started with the collection of use cases, i.e. the structured description of processes required for the design, delivery and exploitation of Open Badges. Use cases were used to integrate, configure and adapt the existing tools and services to match the elicited requirements. The requirements that couldn't be integrated (for example, current issues with the backpack federation) were used to feed-in future developments in the Open Badge Infrastructure. To describe all use cases in one format, a uniform template was developed and published on the OBN portal, so that not only project partners but also members of the Open Badge Network and a larger Open Badges community can download the template, describe their use case and upload it to the OBN portal. Additionally we created a Google Form to enable easy submission and collection of use cases online. Use cases collected within the OBN project can be downloaded from Open Badge Network portal.

⬇ Use Cases collected within the OBN project can be downloaded from here compiled in one file: O2-A1 Use Cases_for_OBN_portal.

📂 Here are all use cases as separate files:

02-A1-01 Automatic MOOC Badging
02-A1-02 Badge application for RPL
02-A1-03 Building a portfolio from badges
02-A1-04 Centralised management
02-A1-05 Collaborative design of badges
02-A1-06 Competency Framework 2016
02-A1-07 Diploma Supplement badge
02-A1-08 Employers reviewing badges
02-A1-09 Hygiene management
02-A1-10 Language proficiency badges
02-A1-11 Open Badges in Distance Education
02-A1-12 Open Badges in schools and HE
02-A1-13 Organisations sharing the badges they created
02-A1-14 Presentation and Participation
02-A1-15 Rewarding students with Geo4work project
02-A1-16 Rewarding students who help other students
02-A1-17 Using badges as a way to express social or political statements
02-A1-18 Validation of in-house training

We invite you to share your use case with the OBN Community. Please fill in this googleform to submit information:

OPEN BADGES AROUND THE WORLD

OPEN VIRTUAL MOBILITY PROJECT

OPEN VIRTUAL MOBILITY LEARNING HUB
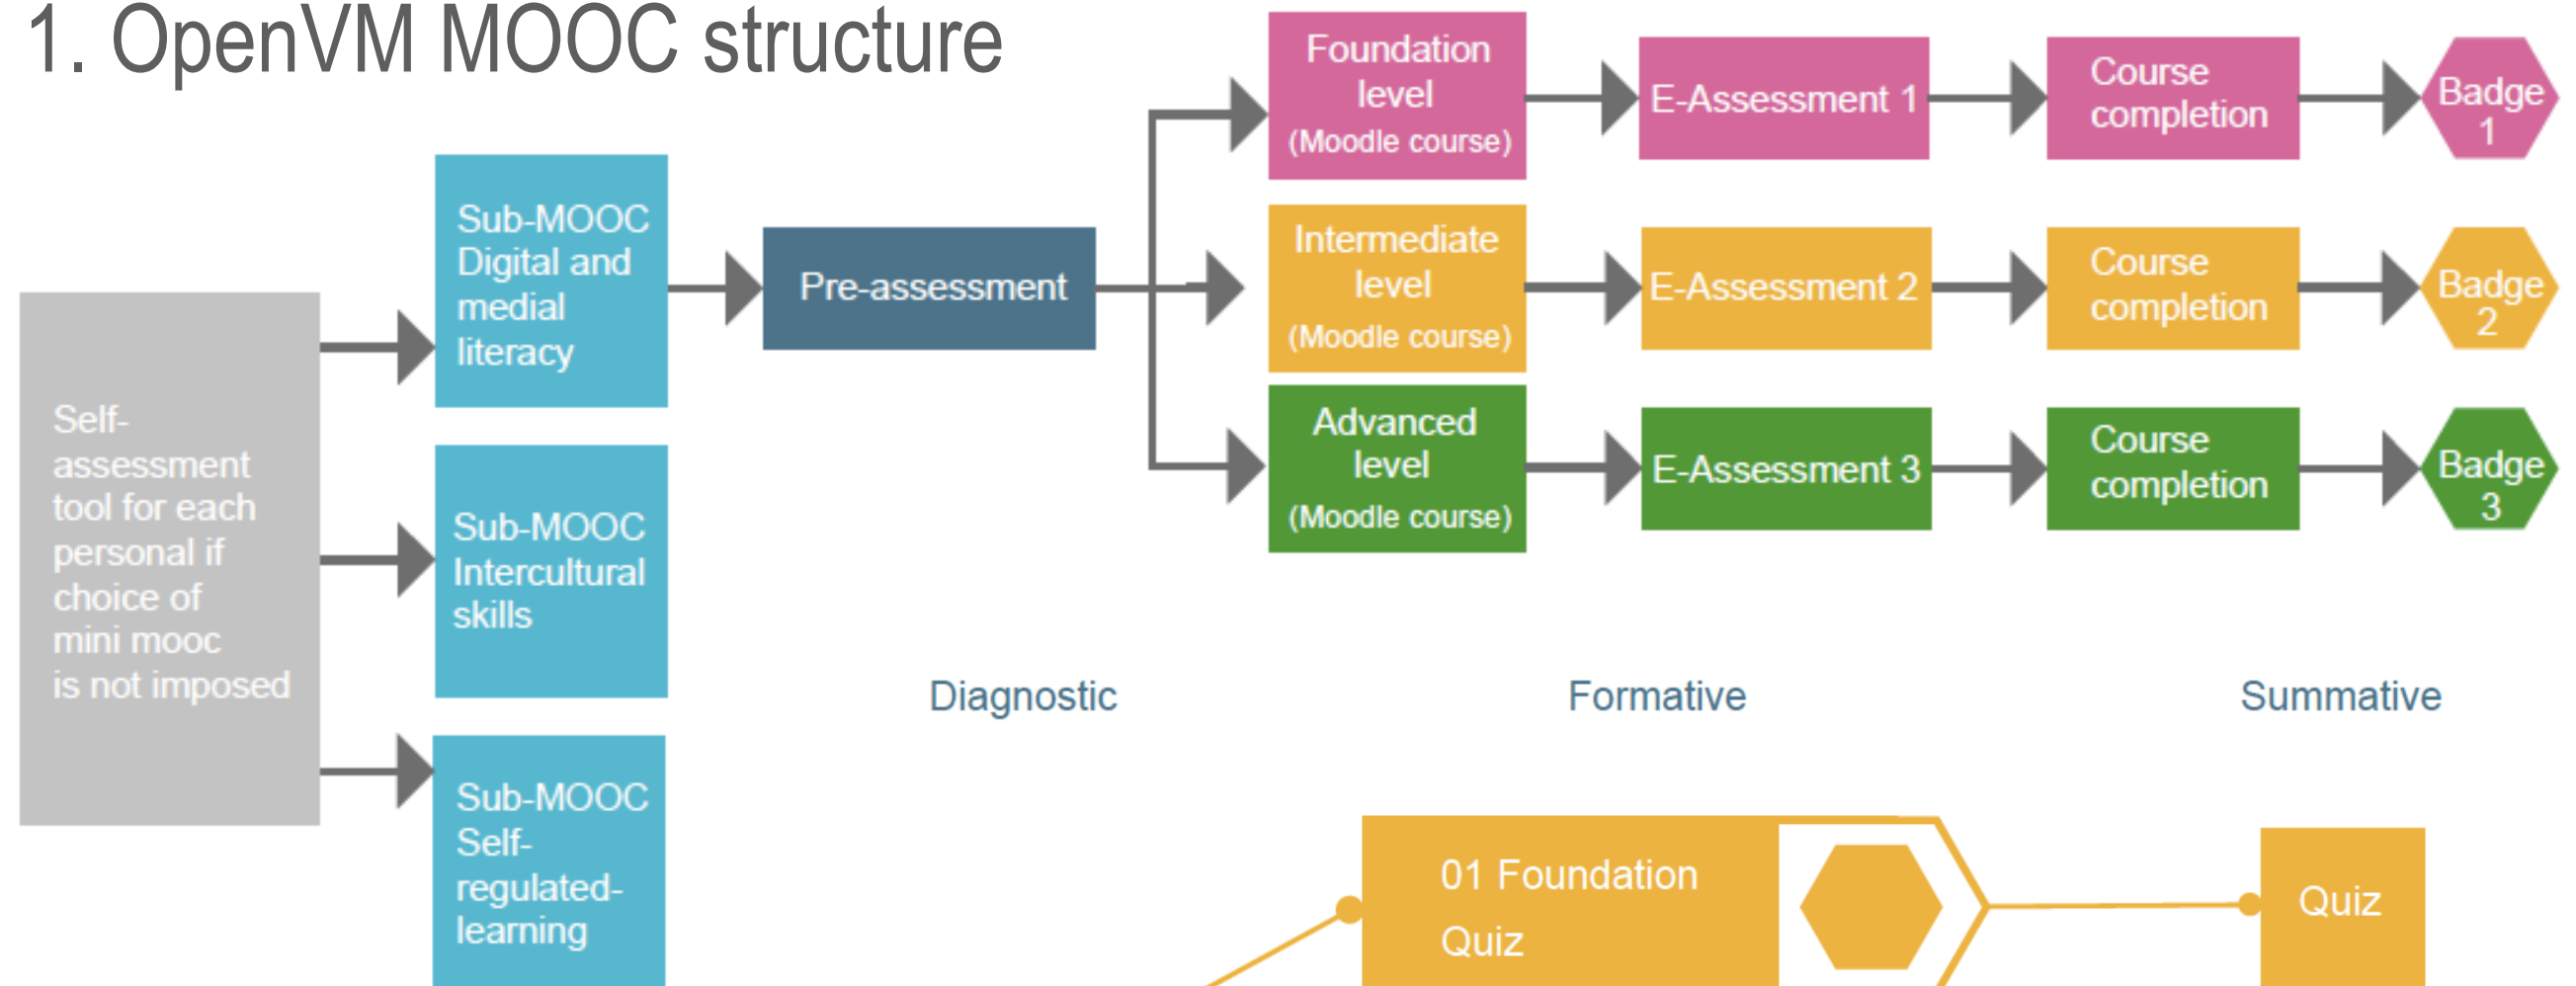

# OPEN VIRTUAL MOBILITY SKILLS
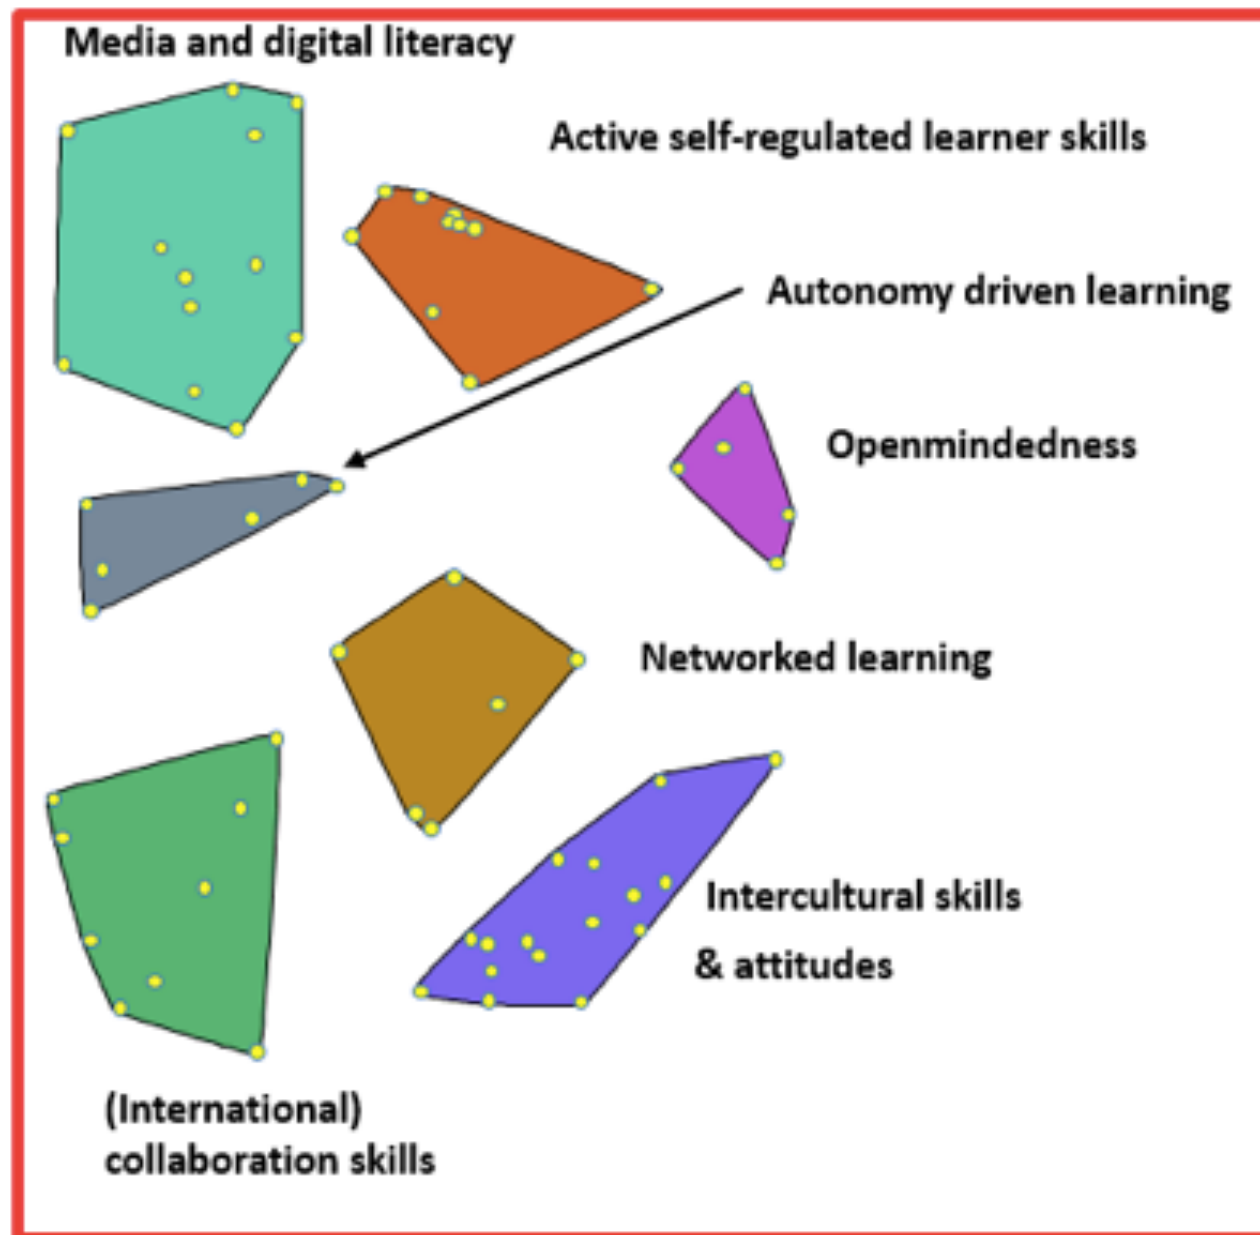

OpenVM competencies and mini-MOOCs:

1. Media and digital literacy
2. Active self-regulated learning skills
3. Autonomy-driven learning
4. Networked learning
5. Intercultural skills and attitude
6. Interactive and collaborative learning in an authentic international environment
7. Open-mindedness
8. Open virtual mobility knowledge

OPEN VIRTUAL MOBILITY MOOCS

1. OpenVM MOOC structure

| Diagnostic | Formative | Summative |

2. Types of e-assessments
